

Line Marking Services

Liberty Services and the London Borough of Enfield

Liberty Services, formed in 1945, specialises in the provision of parking related products to Local Authorities and Private Contractors. Since 2002 it has provided a full signs and lines service - from survey to implementation. Liberty now has over 50 clients using this service.

When Liberty took over a contract from the London Borough of Enfield's previous contractor it found a situation where there was a significant backlog of work. By careful scheduling and prioritising of work the company was able to catch up and ensure that all snagging work was done within two weeks of request.

By doing needs analysis with the client the following programme was agreed:

- Snagging work completed within 5 working days
- Schedule of works drawn up showing completion dates
- On site consultation where parking suspension required
- All work to be implemented to Chapter 5 of the Traffic signs regulations and General Directions 2002

Shortly after commencement the scope of the contract was increased to include all on street work snagging using thermo plastic. Liberty also worked with another out of London authority for TMA 2004 implementation. Liberty was required to burn out all wrongly marked double end markings in continuous un-broken bays and to implement double end markings in segmented bays. As a result the borough achieved full compliance and reduced the number of appeal options.

Liberty offers a full services signs and lines package including:

- Survey, design, proof, manufacture and nationwide fitting service
- 3 thermo plastic trucks and one spray truck
- Guaranteed 10 day delivery from proof approval
- On and off street signs
- Tariff changes
- Full range of suspension signs

"The Road Marking Team at Liberty Services dealt with our backlog of work efficiently and professionally... the whole project was very well organised."

Lynn Kimsey
Parking Services, London Borough of Enfield

OUR MISSION STATEMENT

We operate an ISO 9001 and 14001 quality and environmental management standard ensuring we offer a premium service with competitive prices at all times whilst limiting our impact on the environment.
